

Preface

Second International Conference on New Frontiers in Physics 2013

The conference series "New Frontiers in Physics" aims to promote scientific exchange and development of novel ideas in science with particular emphasis on interdisciplinarity. The main topics of the conference are high energy particle physics, heavy ion physics, quantum optics and quantum entanglement, cosmology, astrophysics, gravity, mathematical physics.

The 2nd International Conference on New Frontiers in Physics (ICNFP 2013) attracted about 200 participants. We would like to thank all the conference participants as well as the members of the International Advisory Committee, the Local Organizing Committee and the organizing institutes and sponsors.

We would also like to thank Anna Zaborowska and Maciej Szymanski of the Warsaw University of Technology and the staff of the "European Physical Journal Web of Conferences" for their help with the proceedings.
