

Aim of the Symposium

This Symposium continues the tradition, started with the 2002 Symposium held at CERN, of promoting exchanges and discussions between physicists involved in cosmic ray research, high energy accelerator and colliding beams experiments. It focussed on high energy hadron collisions of cosmic ray particles and related topics. Also highlighted were the accelerator studies of hadronic interactions at very high energies and the consequent interpretation of the cosmic ray data as well as an understanding of hadronic interactions from cosmic ray data.

International Advisory Committee

David Berge
Alexander Borisov
David d'Enterria
Albert de Roeck
Ralph Engel (Chair)
Tom Gaisser
Simone Giani
Fabiola Gianotti
Jan Fiete Grosse-Oetringhaus
Sunil Gupta
Yoshitaka Itow
Paolo Lipari
Bryan Pattison
James Pinfold
Michael Schmelling

Local Organizing Committee

David Berge
Michelle Connor (Administrative Support)
Elena Gianolio (Administrative Support)
Albert de Roeck (co-Chair)
Michelangelo Mangano (co-Chair)
Bryan Pattison
