13<sup>th</sup> International Conference „Experimental Fluid Mechanics 2018” was held in the Planetarium and Stefanik’s Observatory in Prague (Czech Republic), November 13<sup>th</sup>-16<sup>th</sup>, 2018.

The EFM conference is focused on obtaining overviews of projects under investigation and experimental methods used in the field of fluid mechanic and thermodynamic. Its aim is to organize a network of research workers who are interested in experimental, and also theoretical, work in the field of fluid mechanic and thermodynamic. The conference should contribute the creation of closer contacts and sharing experience in application of various experimental methods, preparation and implementation of experiments, processing of results and numerical simulations of experiments.

*Keynote lectures for 2018 were:*

**Prof. Petr Kulhanek** from Czech Technical University (for his research please see [https://www.aldebaran.cz/~kulhanek/index\\_en.html](https://www.aldebaran.cz/~kulhanek/index_en.html)): *Magnetospheres of Planets*

**Dr. Pavel Psota** from the Research Centre for Special Optics and Optoelectronic Systems: *Interferometric Techniques for EFM*

**Assoc. Prof. Kazimierz Peszynski** from Univ. of Technology and Life Sciences in Bydgoszcz: *Building a bridge between industry and theory on the example of a new ventilation system*

We would like to thank to our sponsors (in alphabetical order)

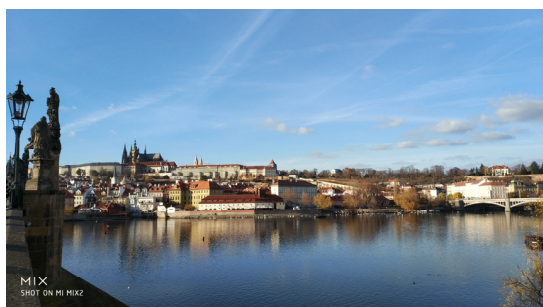

DANTEC DYNAMICS GmbH ([www.dantecdynamics.com](http://www.dantecdynamics.com)),

LAVISION (<http://www.lavision.de/en/>),

MIT s.r.o. ([www.mit-laser.cz](http://www.mit-laser.cz)),

TSI GmbH ([www.tsi.com](http://www.tsi.com)),

4JTECH (<http://4jtech.cz/en/247-2/>).
