### Acknowledgments:

We are deeply indebted to J. Kreisel and P. Bouvier for introducing us to the high-pressure studies. We are also grateful to P. Tavares, M. Guennou, M. C. Weber and D. A. Mota, for their valuable and fruitful collaboration in studying perovskites under high-pressure, to M. Mihalik and W. Ren for supplying the used samples, and to I. Peral, V. H. Rodrigues and M. M. R. Costa for helping in XRD data analysis concerning the papers that this work is based. We are also grateful to G. Garbarino (ESRF), M. Mezouar (ESRF), Z. Konopkova (DESY) and HP. Liermann (DESY) for their scientific assistance, and to G. KH. Rozenberg and M. P. Pasternak for giving access to the details of their published XRD data concerning  $\text{EuFeO}_3$  and  $\text{LuFeO}_3$ . We also acknowledge the support of the Projects Norte-070124- FEDER- 000070, No. PTDC/Fis-NAN/0533/2012, PEST-C/FIS/UI0036/2011, and Grant PD/BD/114456/2016, regarding the same mentioned papers.
