efm.conf@gmail.com

15th International Conference “Experimental Fluid Mechanics 2021” was held in the North Bohemian Museum Liberec (Czech Republic), November 23th–26th, 2021.

The EFM conference is focused on obtaining overviews of projects under investigation and experimental methods used in the field of fluid mechanic and thermodynamic. Its aim is to organize a network of research workers who are interested in experimental, and also theoretical, work in the field of fluid mechanic and thermodynamic. The conference should contribute the creation of closer contacts and sharing experience in application of various experimental methods, preparation and implementation of experiments, processing of results and numeric al simulations of experiments.

Keynote lecture for 2021 was:

Dr. Vladimír Kulish from Czech Technical University in Prague: *Viscosity: how much viscous stream buckling can tell us about transitions between flow regimes*
