14th International Conference "Experimental Fluid Mechanics 2019" was held in the INGO Casino Františkovy Lázně (Czech Republic), November 19th-22nd, 2021.

The EFM conference is focused on obtaining overviews of projects under investigation and experimental methods used in the field of fluid mechanics and thermodynamics. Its aim is to organize a network of research workers who are interested in experimental and also theoretical work in the field of fluid mechanics and thermodynamics. The conference should contribute to the creation of closer contacts and sharing experience in the application of various experimental methods, preparation and implementation of experiments, processing of results, and numerical simulations of experiments.

Keynote lectures for 2019 were:

Dr. Marco La Mantia from The Charles University: *Visualization of superfluid helium flows.*

Dr. Sergeev Daniil from The Russian Academy of Sciences: *Experimental investigation of multiphase hydrodynamics of the ocean-atmosphere boundary layer within laboratory modeling.*
