

Welcome back to *EFM 2025*! This year's conference in the inspiring setting of the North Bohemian Museum in Liberec once again brought together a vibrant community of researchers, innovators, and industry partners. After entering a new era under refreshed patronage, the conference proudly continues as the EFM we all know and love.

Your energy, your presentations, and your commitment to advancing the fields of fluid mechanics, thermodynamics, experimental methods, and their growing applications made this year's event truly exceptional. We are deeply grateful for every paper presented—each of them now published in the *EPJ Web of Conferences*.

Most importantly, *you*—our participants—are the reason the EFM tradition thrives. Thank you for bringing EFM 2025 to life with enthusiasm, curiosity, and collaboration.

And now the most exciting part: **We're already looking forward to the next EFM!**

Join us again **18–20 November 2026** as we continue shaping the future of our scientific community. For all updates, news, and deadlines, keep an eye on **www.efmconf.com**.

Here's to another successful year—and to the unforgettable EFM 2026 ahead!

Petra and Jaroslav
